

# LATIN PRONUNCIATION PRACTICE

(rev. May 14, 2014)

After studying Wheelock's discussion of the alphabet, syllabification, and accentuation (pp. xxxv-xli), AND listening to the INTRODUCTION on the CD or the AUDIO FILES page at <http://wheelockslatin.com/chapters/introduction/introduction.html>, (1) syllabify, (2) bracket or underline the long syllables, and then (3) accent each of the first several words on this list, using the blank spaces provided (e.g., dis-cí-pu-lō, ka-lén-dae); then (4) go through the list and practice pronouncing ALL the words; bring this handout to class and we'll go over it.
